1. EXECUTIVE SUMMARY

PAMS Pacific Admiralty Maritime Services is a premier, independent technical maritime consultancy and surveying firm operating at the strategic crossroads of the European and Asia-Pacific maritime sectors. Headquartered in Metro Manila, Philippines, with deep operational roots in Greece, PAMS delivers top-tier technical oversight, statutory compliance auditing, and marine surveying assets to global shipowners, operators, and classification societies.

Led by senior marine professionals with over 24 years of international maritime engineering and superintendent experience, PAMS bridges the gap between strict international standards and local operational realities. Through our formalized cooperation with the Phoenix Register of Shipping (PHRS), PAMS serves as a powerful, exclusive vehicle for regional class expansion, backed by unrivaled local market penetration.

2. CORE TECHNICAL CAPABILITIES & SPECIALIZED SERVICES

PAMS provides a comprehensive suite of high-level technical services, executed under rigorous quality management frameworks (ISM, ISPS, MLC 2006) and fully aligned with global conventions and local flag state mandates:

Statutory & Class Surveys

Full capability to execute hull, machinery, and equipment surveys in strict accordance with international conventions and classification society specifications.

Safety & Security Auditing

Certified Lead Auditors specializing in International Safety Management (ISM), International Ship and Port Facility Security (ISPS), and the Maritime Labour Convention (MLC 2006).

MARINA-ACCREDITED SAFETY & EQUIPMENT SERVICES

Fully authorized to conduct specialized technical inspections, structural testing, and statutory certifications as a recognized service provider under the Maritime Industry Authority (MARINA) frameworks:

- **Fire Fighting Appliances (FFA / FFE Accreditation):** Comprehensive inspection, diagnostic testing, and maintenance certification of fixed and portable marine fire suppression systems.
- **Life-Saving Appliances (LSA Accreditation):** Authorized safety testing, structural inspections, and certifications of lifeboats, launching appliances, liferafts, and personal life-saving gear.
- **Lifting Equipment & Cargo Gear Accreditation:** Accredited structural integrity examinations, certified load testing, and comprehensive statutory certification of onboard marine cranes, derrick systems, and loose lifting gear items.

Offshore Engineering Asset Management

Specialized technical oversight, maintenance analytics, and statutory compliance audits for high-value offshore assets, including Floating Production Storage and Offloading (FPSO) units and Single Point Mooring (SPM) buoys up to 300,000 DWT configurations.

Pre-Purchase & Condition Surveys

Completely independent, third-party asset protection assessments, asset valuation, structural evaluations, and detailed pre-purchase inspections globally.

3. STRUCTURAL ASSETS & TECHNICAL ADVANTAGE

Our operational infrastructure relies on elite engineering pedigree, high-end mobile equipment layouts, and localized sovereign authorizations:

- **European Engineering Standards:** All technical programs and operations are directly managed by European-trained Marine Technical Superintendents and Mechanical Engineers, ensuring uncompromising analytical accuracy and ethical reporting.
- **Authorized Service Supplier Status:** Holding verified, multi-tiered **MARINA Accreditations for FFE, LSA, and Lifting Equipment** allows PAMS to act as a highly efficient, single-source technical solution for shipowners needing integrated Class inspections and mandatory statutory hardware certifications simultaneously.
- **Advanced Non-Destructive Testing (NDT) Infrastructure:** Fully equipped to immediately mobilize field inspection gear, including specialized ultrasonic thickness measurement (UTM) and structural stress instruments for complete hull and heavy crane metrics.

- **Strategic Regulatory Footprint:** Operating a commercial office in Pasay City, Metro Manila—the absolute administrative center of the Philippine maritime regulatory district—enabling instant access to key drydocks, ports, and governmental hubs.

4. MARKET PENETRATION & IMMEDIATE COMMERCIAL ACCESS

PAMS holds an exceptional, verified commercial network within the domestic and regional Philippine shipping sectors. Our active market footprint represents an immediate launchpad for tonnage expansion:

- **Direct Shipping Pipelines:** Retaining mature, unshakeable technical lines and communication channels with **more than 30 local shipping companies** operating actively within the domestic archipelago.
- **Immediate Tonnage Capture Potential:** Our actively engaged shipowner group represents a combined, addressable fleet volume of **approximately 120 vessels** currently seeking operational optimization in classification, specialized statutory equipment certification, and safety compliance frameworks.
- **Dominance in High-Velocity Sectors:** Deep technical penetration within the local **Passenger Vessel and Roll-on/Roll-off (Ro-Ro)** fleet sectors—the highest-velocity maritime segments in the Philippines where specialized LSA, FFE, and Lifting Gear inspections are under severe regulatory surveillance.
- **Accreditation Readiness:** Active, advanced structural processing with **MARINA** to anchor full, unrestricted regulatory classification society accreditation, positioning our exclusive partnership to capture market share from legacy non-IACS entities immediately upon formalizing terms.

5. LEADERSHIP PROFILE

Managing Director: Senior Mechanical Engineer & Marine Technical Superintendent

- **24+ Years of Continuous Executive Track Experience** spanning international ship management networks, detailed newbuilding construction design studies, fleet superintendent oversight, and active field marine surveying.
- **Certified Exclusive Surveyor and Lead Auditor** across multiple major international global maritime regulatory frameworks (including ISM, ISPS, and MLC 2006 specifications).

PAMS Pacific Admiralty Maritime Services — Your Trusted Technical Partner in the Asia-Pacific Region.
